Introduction

- Hate speech indicates the increasing level of discrimination, hostility or violence; Due to the increase in the number of pages and websites owners, who constitute this new media on one hand, and on the other hand; Because of the political, tribal and regional shipping that Libya suffers from, the contagion of this abhorrent speech spread to everyone who went through it, until this speech became a title on the sincerity of belonging to the tribe or region.
- Hate speech is considered a form of verbal violence, as the language of insults, slander, libel, defamation, hatred, intolerance, discrimination, supremacy, demeaning and exclusion of the other is louder, and we will not be able to count what each side says about the other, and what's in it from lies, slander and myths. And all of this to demonstrate the invalidity of the opponent and his righteousness, and for the battle to move from being an intellectual one to enmity with individuals and their existence, and incitement to violence against them.
- In general, hate speech may be subject to manipulation, and the accusations of incitement to hate speech may be circulated among political opponents or used by those in power to contain dissent through text, pictures or voice.
- The Falso team monitored hate speech and fake news in the press content of 15 Libyan media outlets by tracking their websites and Facebook pages, which are mostly biased towards one of the parties of the armed conflict, and the accompanying great professional decline and the slippage of media platforms towards supporting armed parties and carrying out propaganda, so that a new type of media was established that does not adhere to the ethics of the profession, and derives its legitimacy from the tyranny of the regimes. And this role has evolved through the ownership of many non-professional journalists and correspondents of practice and experience over time, and thus we are facing a media situation that has not been stabilized and has not been fully formed yet, and hence, the criteria for evaluating the experience differ according to contexts. The circle of difference within a country may expand from one region to another according to ethnic, ideological and regional divisions.

- In this regard, the working team monitored 24073 professional violations, which indicates the crude practices followed by the media outlets in their coverage of the grinding war that the Libyans waged against each other with international support and instructions, hostilities increased through satellite channels and social media sites, which reveals the extent of hostility, antagonism, lack of professionalism and the use of many methods to falsify facts in order to serve specific interests, but rather “added fuel to the fire” in mobilizing Libyans to fight against each other, so that the media performance takes a different course and varies according to the degree of conflict. And the more the spaces for expression
- and access to news becomes narrow, the higher the ceiling for deviating from professional ethics of the journalistic work, so that interest in these ethics becomes absurd compared to the size of the tragedy, so the media coverage gradually slips and turns into a part of the scene of conflict and clash.

Executive summary

This report sheds light on professional violations in press content, so that journalists can avoid practicing all forms of incitement, insult, defamation and other professional offenses in all forms of journalism and produce objective journalistic content free from bias, especially since some media outlets took a biased stance during their coverage. This often puts them in front of a professional and ethical dilemma, especially if this prejudice seeks to place a group or individuals in a negative frame that in front of society, and in many cases this prejudice turns into a kind of discrimination and incitement to hatred, which increases the likelihood that this group or individuals will be exposed to violence.

Throughout the first half of 2020, and through 5 monitors, the monitoring team of the “Falso” platform worked on quantitatively monitoring 15 media outlets, on a 24-hour basis, for their websites and Facebook pages, to monitor and track professional violations in all multimedia “photos, videos, written reports, news, newsletters”. The observation and continuous monitoring of these media showed a significant increase in professional violations, as 24073 professional breaches were monitored, which is a very large number.

Work has also been done closely to verify rumors and false news that are leading the trend on social media, and there is a great response and interaction from the Libyan public, which strengthens the position of the “Falso” platform as the first digital platform working to monitor hate speech and fake news in Libya.

Giving the large financial and human cost of quantitative monitoring, we have developed the research methodology to rely on qualitative monitoring of news instead of quantitatively, with a smaller team that can monitor and track over a continuous 24-hour period.

Methodological framework of the study

- **Justifications for choosing the subject of the study**

Media coverage of conflicts and armed conflicts in Libya was characterized by hate speech, false news, incitement to violence, and misleading of the public in the interest of one of the parties of the conflict, which was keen to change some of the professional reports that are not biased by deleting some parts and changing the contents in professional ways to produce reports different from the original ones. Fake websites and biased television channels and newspapers spread, some analysts disguised themselves as journalists, and inflammatory terms such as “war criminals, terrorists and invaders” abounded, with an apparent failure to implement the law that could deter the promoters of hate speech, as citizens have no confidence in the media; Because the conflicting parties exchanged accusations, and blamed each other, most of the followers were forced to search the Internet to examine the photos in order to uncover fake news themselves.

In addition to the dearth of scientific studies that have dealt with hate speech in the Libyan media, and the use of many methods to falsify facts; To serve specific interests, and the importance of having an analytical study that deals with hate speech through the websites of satellite channels and social media sites, which necessitated studying the reality of the media in Libya during the current period, and accordingly the problem of the study is determined in setting the main question to it, which is:

How widespread is hate speech on Libyan satellite channels and social networking sites?

Based on the above, the research problem was identified in the following heading:

How widespread is hate speech on the websites of Libyan satellite channels and social networking sites?

• Study questions

Based on what has been identified in the study problem, the main question of the study is represented by seeking to answer the following :

- 1 | What are the local media and social media that adopted the method of incitement and false news in their media discourse during the study period?
- 2 | Who are the producers of this speech? What are the groups targeted by incitement speeches?
- 3 | What are the journalistic forms through which professional violations were monitored?
- 4 | What are the sources of professional violations that the media relied upon?

• The importance of the study

The study gains its importance from the importance of the study's subject itself, as the spread of political conflict and the absence of community peace and exclusionary thought prevailing in the country that does not allow for meaningful dialogue or an exchange of views on the issues of society, and in light of the use of satellite channels and social media in spreading hate speech among members of society and calling for regionalism and societal violence.

Its importance lies in the fact that it fights, by the monitoring and documenting, the professional violations committed by media persons in the Libyan media during armed conflicts and their negative effects on societal peace.

As it is among the first modern studies documenting professional practices, the imbalances in the Libyan media, and the consequences of these legal and social practices.

Objectives of the study

Based on the problem that the study deals with and the theoretical framework on which it is based, the study sought the following:

- **Professional goals**

- 1 | Identifying the classification of the media outlets most practicing hate speech, according to professional violations during the study period.
- 2 | Identifying the classification of arts and press formats according to the nature of hate speech and false news in the media outlets monitored in the study, and documenting all professional violations practiced by them .
- 3 | Identifying the distribution of the producers of professional violations according to the nature of hate speech and false news in the surveyed media outlets.
- 4 | Trying to raise the level of media discourse in the Libyan media by monitoring the violations that occurred in it, trying to avoid falling in it again, contributing to improving the quality of press content, combating fake news, and combating hate speech in the local media outlets.

- **Cognitive goals**

- 1 | Instilling the concept of accuracy in journalistic work, and urging definition and commitment to ethics in journalistic work in all media outlets.
- 2 | Attempting to spread the culture of legal awareness among those who communicate in the Libyan media, and to reinforce the dimensions and concepts of social responsibility of the media, and the various consequences of incitement and false news speech, including legal accountability.

• Study Approach

This study is based on the use of the descriptive research method to review the most important literature related to the subject of the study, and the descriptive method aims to study the reality and is concerned with describing it accurately. It expresses a qualitative or a numeric expression, and the concept of it is related to the study of events, as it draws useful conclusions about it, either to correct a fact, update it, supplement it, or develop it.

The study was conducted to cover this practical aspect, through which it tries to answer the study's questions and draw its conclusions by relying on the method of content analysis that was developed for the purposes of the study according to what is known, to monitor false news and speeches of violence and incitement during the study period through a research methodology based on quantitative and qualitative monitoring, in order to survey the digital Libyan media based on international professional standards and ethical practices in media institutions.

The monitoring process was based on counting the number of occurrences of hate speech and armed conflict, in addition to the number of recurrences of professional violations related to false or misleading news, as the monitors fill in the digital database that consists of several variables to become a database that contains numbers and statistics that help calculating and reading the percentage and nature of these violations.

• Study population

The study population consisted of 15 media outlets whose programs were monitored 24 hours a day in a comprehensive survey method to achieve the study's objectives, and these media outlets are: Libya Al-Hadath Channel - Libya Panorama Channel – Libya Rouha Alwatan– Al-Tanasuh Channel - Libya Al-Ahrar Channel - February Channel - 218 News Channel - Al-Jamahiriya Channel - Ain Libya News Site - Libya News Website 24 - Alsaaa 24 News Site - Al-Marsad Newspaper – AlOnwan Newspaper - Al-Raed Network - Africa Gate.

• Targeted media outlets

- Libya Al-Hadath, a television channel established in May 2016 that follows the leaders of the Dignity (Al Karama) Forces in the city of Benghazi, and it is believed that its ownership belongs to Saddam Khalifa Haftar.
- Libya Panorama, a television channel that began broadcasting in 2014 and presents itself as a diversified channel that cares about public affairs and is close to the Justice and Construction Party.
- Libya Rouha Alwatan it is a diverse Libyan news channel that presents itself as supporting the civilian orientation and is also known for its strong bias towards the Dignity (Al Karama) camp.
- Al-Tanasuh Channel, which is a television and a radio channel that began broadcasting in 2013 that presents itself as a diverse Islamic cultural channel and is known to be close to the Mufti of Libya.
- Libya Al Ahrar Channel, which is a television channel that was launched on April 1, 2011, at the behest of the former Emir of the State of Qatar, Hamad Al Thani, in Doha before moving to Istanbul in 2018.
- February Channel is a television channel that presents itself as a spokesperson for the February Revolution and was founded in April 6, 2019 and is known to support the Burkan Alghadab Operation.
- 218 News Channel is a news service that follows the diversified 218 Channel and depends on events (News and Adjustment). It launched its test broadcast in late 2017 in Jordan and it is close to the Dignity (Al Karama) camp.
- The Jamahiriya channel, which is the old name of the Libyan television during the previous regime era, is now officially broadcasting from Cairo and is involved in fueling conflict and internal violence.
- Ain Libya news site, which is a specialized digital platform that provides the most prominent news and press coverage throughout the day and provides news coverage biased towards the Government of National Accord.

- Libya News 24 website is known to be a detail-oriented news agency that broadcasts from Benghazi and other cities around the world and is known for its strong bias towards the Dignity (Al Karama) camp.
- Alsaaa 24 news website, which is a news website created on August 19, 2019, and is known for its strong bias towards the Dignity camp.
- Al-Marsad Newspaper, which is a website providing a news service that was established in February 2016 and broadcasts from Jordan.
- AlOnwan Newspaper presents itself as a comprehensive Libyan electronic newspaper, established on December 11, 2017, and owned by the son of the Libyan General Saddam Khalifa Haftar.
- Al-Raed Network, a news network that broadcasts on social media, after what was a television channel established in July 2014 and now managed by the Justice and Construction Party
- Africa Gate, a news platform launched on November 25, 2013, run by multi-national journalists and known for its bias to the former regime.

- **Data collection tools**

In this study, a content analysis form was used as one of the tools of scientific research, through which the direction and content of the media material that is analyzed was scientifically identified and its characteristics identified objectively (1), as a tool to identify fake news by comparing it with news that denies its authenticity, and also to determine the inflammatory contents during the study period.

- **The limits of the study**

Temporal boundaries: The chronological limits of this study are the period from January 1st to June 30th , 2020.

Spatial boundaries: Work was carried out in the cities of Tripoli and Tunis, where the work of the Libyan Center for Freedom of the Press is concentrated, during which 5 monitors worked on following 15 media outlets for their websites and official Facebook pages.

Objective boundaries: The subject of the study was limited to monitoring media discourses during the study period for the aforementioned media outlets to record the speeches that included violations thereof during the analysis period, and the report was prepared between September 1st and December 31st, 2020.

First: Professional violations

Professional Violations: (24073) violations of a profession were monitored during the study period extending from the beginning of January to the end of June (2020). These violations were monitored from the targeted media outlets, numbering (15) outlets, as well as the producers and sources of these professional breaches and the target parties were identified. As well as the authorities, and these violations have been classified into two types:

A. Hate speech and armed conflict

Incitement, insult and defamation were the highest percentage and amounted to 69% of the nature of violations related to demeaning hate speech and armed conflict, which means that newsrooms focused directly on incidents such as stigmatization, stereotyping, and defamation of others and incitement against them.

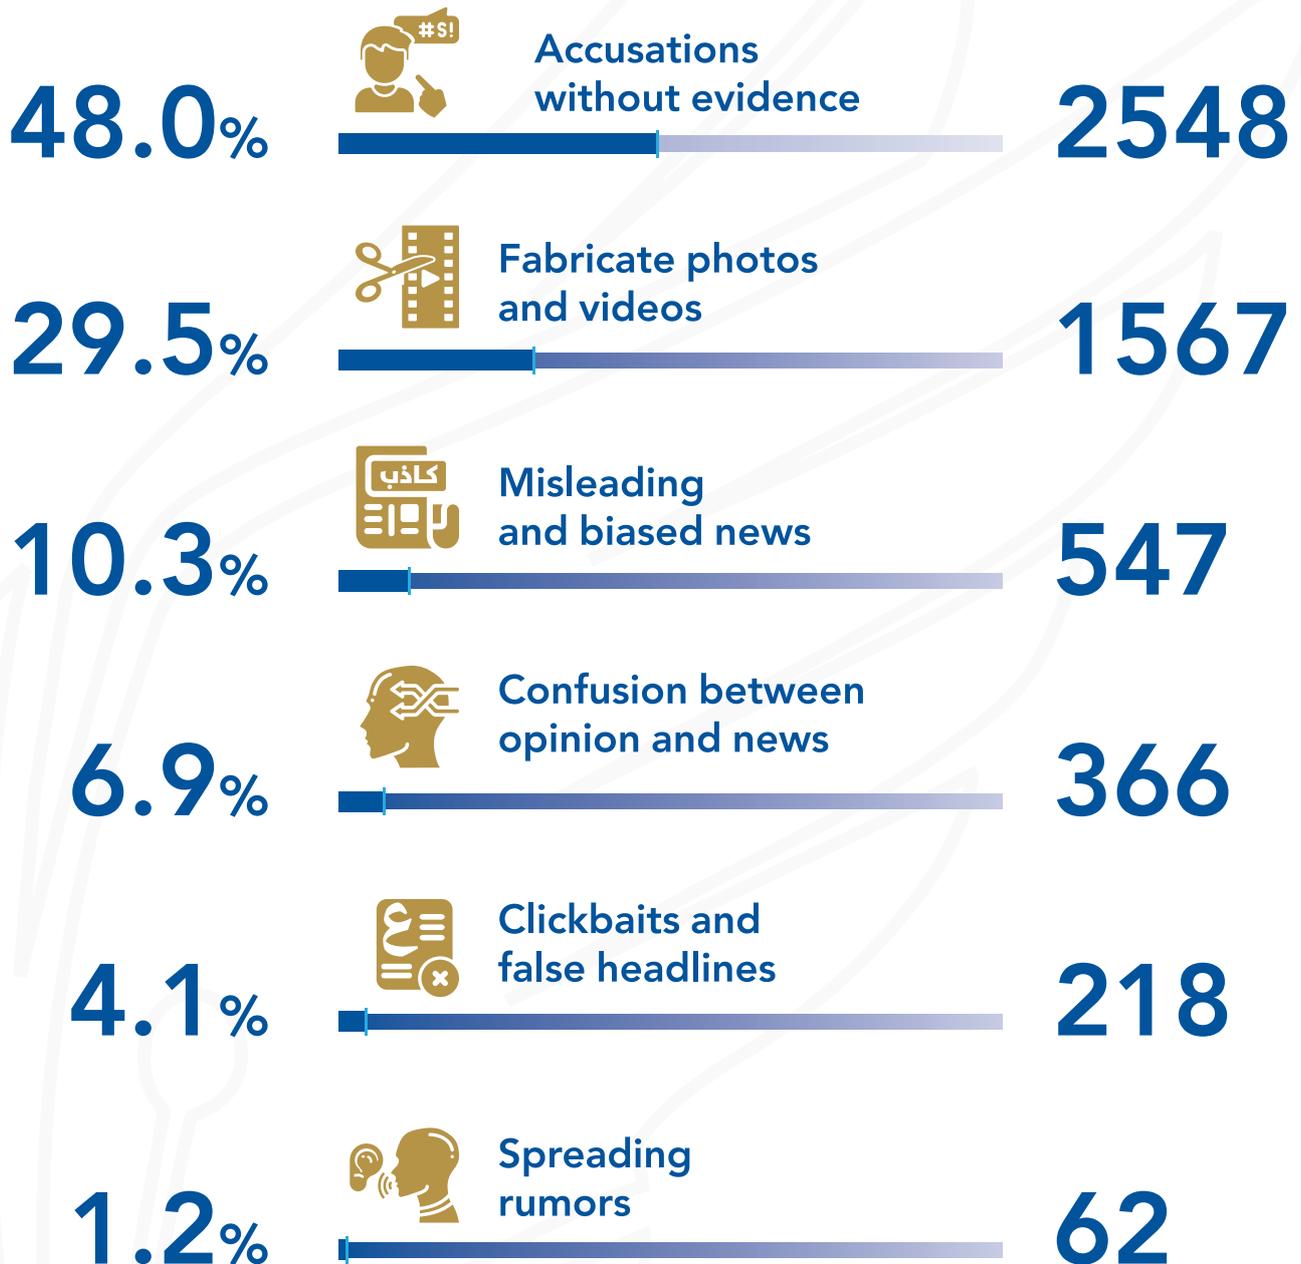

The inaccuracy and lack of objectivity in covering armed conflicts was at a rate of 13%, meaning that the media do not take into account the necessary professional standards in its coverage of current events, and the explicit and direct call for violence and killing approached 11%, incidents that we may have become accustomed to in the convulsive media discourse of some Libyan media outlets, followed by the publication of photos and videos of prisoners of war, humiliating and insulting human dignity by more than 2%. Photos and videos of the dead, racial discrimination and glorification of targeting civilians were published.

Total 18770

B. Fake news

Journalists and news producers in the targeted media have clearly relied on directing accusations without evidence against their political opponents, as it is the highest among the types of fake news categories, at a rate of 48%, followed by the “fabrication” of photos and videos to use it for deep fakes, at a rate of 30%, followed by misleading and biased news, at a rate of 10%.

Total 5308

C. Professional violations for every month

The final results showed that the most professional violations were committed during the month of April, (5291) professional breaches were monitored, followed the number of violations in the month of March, (5032) professional violations were detected. In the third place, the violations from January, (3865) professional violation, followed by May when (3681) breaches were monitored, then February , when the number amounted to (3591), and finally the violations decreased in June, that was when (2,613) violations were recorded.

			Type of Violation		Total	Ranking	
			Fake news	Hate speech			
Month	April	Number	675	4616	5291	1 st	
		Percentage %	12.8	87.2	100.0		
	March	Number	1198	3834	5032	2 nd	
		Percentage %	23.8	76.2	100.0		
	January	Number	1351	2514	3865	3 rd	
		Percentage %	35.0	65.0	100.0		
	May	Number	713	2968	3681	4 th	
		Percentage %	19.4	80.6	100.0		
	February	Number	968	2623	3591	5 th	
		Percentage %	27.0	73.0	100.0		
	June	Number	403	2210	2613	6 th	
		Percentage %	15.4	84.6	100.0		
	Total		Number	5308	18765	24073	
			Percentage %	22.0	78.0	100.0	

Second: Ranking of the media outlets with the most professional violations to the lowest

- Al-Jamahiriyah TV, which is based in Cairo, topped the list of channels most committing professional violations with a number of (3030) professional violations at a rate of 12.6%, ranking first for the media outlets most practicing hate speech.
- Al-Tanasuh TV comes in second place, with (2632) professional violations, at a rate of 10.9%, followed directly by the Libyan newspaper, Al-Marsad, in third place, at a rate of 10.8%, with (2,600) professional violations, and these three are the most practiced for spreading rumors and biased and misleading news.
- In the fourth place, came the February channel with (2279) professional violation at a rate of (10%), followed by the Alsaah 24 news website, with (2,276) violations, at a rate of (10%). In the sixth place, the Libya Al-Ahrar channel, with (2,100) violations, at a rate of (9%), and in the seventh rank, Al-Raed Network committed (1660) violations with a percentage of (7%), followed by the Al-Hadath News Channel, where (1571) violations were detected, at a rate of (7%), while in the ninth place, Libya Panorama Channel committed (1363) violations, at a rate of (6%).
- Then the Libya News 24 website with (1145) violations, at a rate of (5%), followed by the Libya Rouha AlWatan channel, where (948) violations were monitored, at a rate of (4%). In the twelfth place, the Africa Gate with (711) violations and a percentage of (3%), and in the thirteenth place, 218 News Channel, where (600) violations were detected, with a percentage of (3%), while in the fourteenth place, AlOnwan newspaper recorded (592) violations, at a rate of (3%), and finally came the news site Ain Libya, where (566) violations were detected, at a rate of (2%).

			Type of professional violations		Total	Rank
			Fake news	Hate speech		
Media institution	Al-Jamahiriya TV	Number	801	2229	3030	1 st

the ranking of media outlets according to the number of professional violations they committed.

Third: The press formats through which professional violations were committed according to the media

- 1 | Al-Hadath News Channel:** (1571) violations were detected, including (160) in headlines, (632) violations in news or written news reports, (54) in news bulletins, (237) in pictures and videos, and (461) in video reports or separate footage, (8) in press interviews, and (19) violations in private coverage.
- 2 | Libya Panorama Channel:** (1363) violations were detected, including (145) in headlines, (414) in news or written news reports, (265) in news bulletins, (169) violations in pictures and videos, (190) in video reports or separate footage, (7) violations in press interviews, and (173) violations in private coverage.
- 3 | Libya Rouha Al-Watan channel:** (948) violations were detected, including (115) in headlines, (462) in news or written news reports, (264) in news bulletins, (20) in pictures and videos. (47) violations in video reports or separate clips, (25) in press interviews, and (15) violations in private coverage.
- 4 | Al-Tanasuh Channel:** (2632) violations were detected, including (335) in headlines, (1197) in news or written news reports, (280) in news bulletins, (312) violations in pictures and videos, (345) in the visual reports or separate footage, and (163) violations in private coverage.
- 5 | Libya Al-Ahrar Channel:** (2100) violations were recorded, including (208) in headlines, (663) in news or written news reports, (453) in news bulletins, (326) violations in pictures and videos, (320) violations in video reports or separate footage, (8) in press interviews, and (122) violations in private coverage.
- 6 | February Channel:** (2279) violations were detected, including (262) in headlines, (703) in news or written news reports, (373) in news bulletins, (305) violations in pictures and videos, (211) violations in video reports or separate footage, (6) in press interviews, and (419) violations in private coverage.
- 7 | 218News Channel:** (600) violations were detected, including (56) in headlines, (260) in news or written news reports, (32) in news bulletins, (95) violations in pictures and videos, (48) in video reports or separate footage, and (109) violations in private coverage.

- 8 | Al-Jamahiriya Channel:** (3030) violations were detected, including (514) in headlines, (1458) in news or written news reports, (479) in news bulletins, (152) violations in pictures and videos, (144) in visual reports or separate footage, one violation in press interviews, and (282) violations in private coverage.
- 9 | Ain Libya news site:** (566) violations were detected, including (36) in headlines, (475) in written news or news reports, (54) in pictures and videos, and one violation in visual reports or separate footage.
- 10 | Libya News 24 Website:** (1145) breaches were detected, including (238) in headlines, (723) in news or written news reports, one violation in news bulletins, (173) in pictures and videos, (9) in visual reports or separate footage, and one violation in press interviews.
- 11 | Alsa 24 News website:** (2,276) violations were recorded, including (264) in headlines, (1718) in news or written news reports, one violation in news bulletins, (4) in journalistic investigations, and (235) in the photos and videos, (144) in visual reports or separate clips, and (54) violations in press interviews.
- 12 | Al-Marsad Newspaper:** (2,600) violations were recorded, including (431) in headlines, (1291) in news or written news reports, one violation in news bulletins, two violations in press investigations, (828) in pictures and videos. (18) violations in visual reports or separate footage, (22) in press interviews, and (7) violations in private coverage.
- 13 | AlOnwan Newspaper:** (592) violations were detected, including (134) in headlines, (357) in news or written news reports, (75) in pictures and videos, (19) in visual reports or separate shots, and (7) breaches in the interviews.
- 14 | Al-Raed Network:** (1660) violations were detected, including (166) in headlines, (1121) in news or written news reports, (338) in pictures and videos, (33) violations in visual reports or separate shots, and two violations in the special coverage.
- 15 | Africa Gate:** (711) violations were detected, including (66) violations in headlines, (329) in news or written news reports, (151) in photos and videos, (150) in visual reports or separate shots, (7) in press interviews, and (8) violations in private coverage.

The press formats through which professional violations were committed according to the media

		headlines	News or written news report	News letter	press report	Photos and videos	Visual reports or separate shots	Press interviews	Special coverage	Total

Fourth: Producers and sources of professional violations

Newsrooms are the main source of promoting and committing professional violations, as we recorded (12332) violations, at a rate of 51%, meaning that newsrooms work according to the agendas of financiers who may be states or parties influencing the conflict in Libya so that journalists remain the victims as a result of the increasing professional pressure exerted on them.

As for the representatives of armed formations or military commanders, they came in second place as a source of publishing professional violations, as (2955) violations were recorded, at a rate of 12%, for their export of hate speech, rumors and misleading news, followed by representatives of the Government of National Accord forces, where (2494) violations were monitored, at a rate of about 10%.

Activists and political analysts that we always see on television, and their videos on social networking sites, come in fourth place, with (1746) violations monitored, at a rate of 7%, followed by program presenters, "TV" correspondents, or editors in newsrooms at rates varying between 4% and 5%.

Producers and sources of professional violations

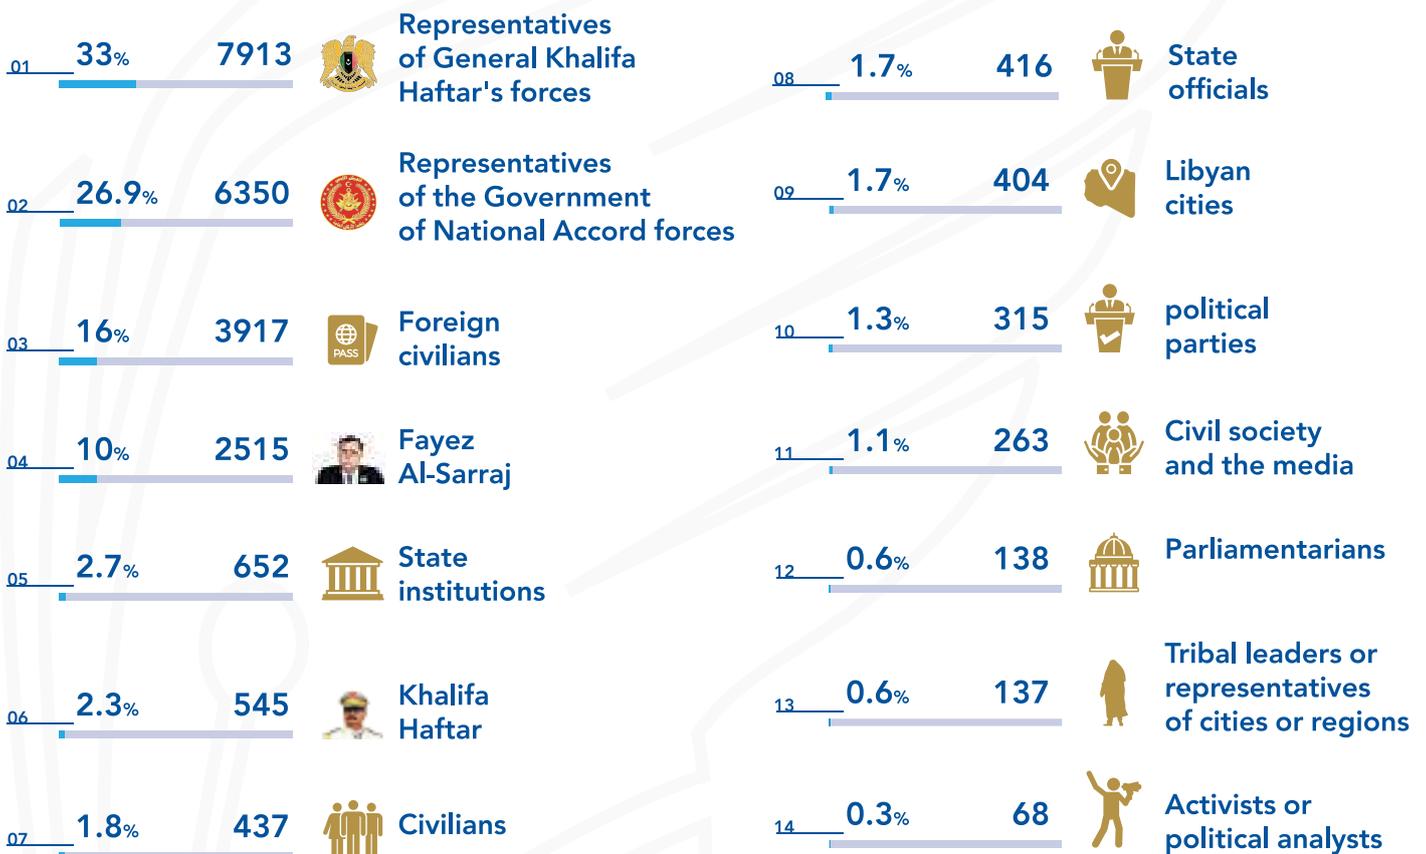

Total 24073

Fifth: The targeted parties and the most frequently used in the press content

Representatives of General Khalifa Haftar's forces topped the list of the most frequently discussed in the monitored media outlets, with a number of recurrences of (7913) professional violation amounting to 33%, followed by representatives of the Government of National Accord forces with a number of (6350) professional violation at a rate of 26.9%, followed by foreign civilians with (3917) violations at a rate of 16%.

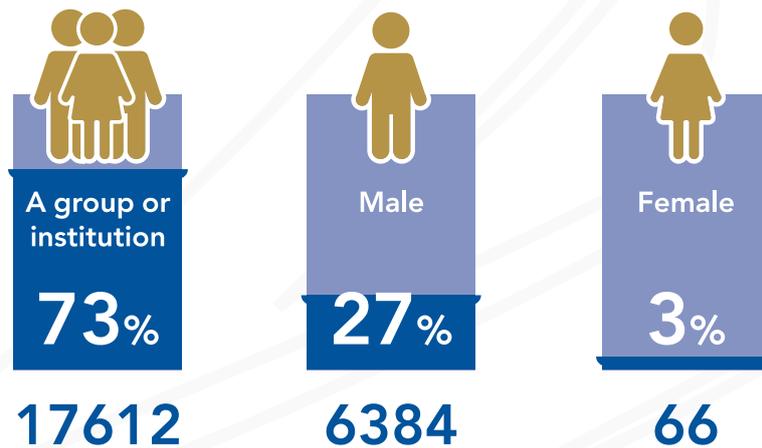

As for the fourth place, Libyan Prime Minister Fayez al-Sarraj with a number of repetitions amounting to (2515) violations, at a rate of 10%, followed by state institutions that are targeted at times by incitement against them, and at other times by spreading rumors about them, with a number of (652) violations, at a rate of 2.7%, followed by the rest as shown in the table.

Total 24070

Sixth: Classifying the gender of the target parties

Here we notice that the parties of the Libyan conflict always focus on targeting groups and entities in the first place, in light of the current conflict situation, with a number of violations amounting to (17612) at a rate of 73%, followed by targeting males with a number of occurrences of (6384) violations, at a rate of 27%, followed by females with a number of (66) violations, at a rate of 3%.

Total 24062

Seventh: Names of the producers of professional violations in the studied media outlets

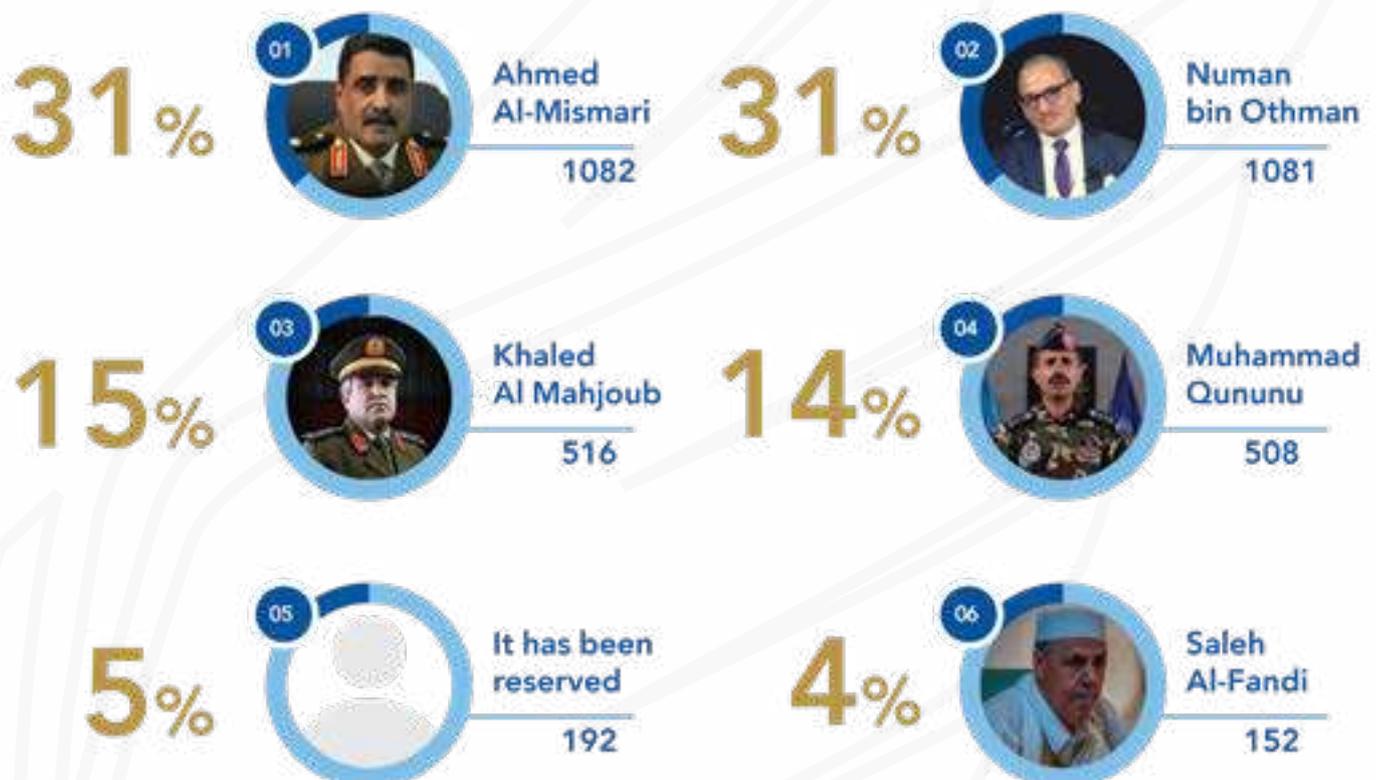

Ahmed Al-Mismari, spokesman for Khalifa Haftar's forces, topped the list of the most practicing of incitement, advocacy of violence and spreading rumors and misleading news, with the number exceeding 1082 professional violations, at a rate of 31%, out of 154 Libyan personalities who practiced the same thing during the media monitoring period for the first half of 2020.

he media monitoring period for the first half of 2020.

Followed by Numan bin Othman, a political activist, whose number of repetitions of hate speech and false news during his television appearance reached (1081) times, at a rate of 30%, then Khaled Al Mahjoub, Director of the Moral Guidance Department of Khalifa Haftar's forces, with a number that reached (516) violations, at a rate of 15%.

This is followed by Muhammad Qununu, spokesman for the Government of National Accord forces, with a number of violations amounting to (508), at a rate of 14%, followed by the fourth person whose name has been reserved, followed by Salih al-Fandi, head of what is known as “wise men and notables of Tarhouna”, with a number of violations that reached (152) at a rate of 4%.

The list is still long and includes military leaders, ministers, notables and tribal representatives, as well as political activists.

Names of the producers of professional violations in the studied media outlets

Results, recommendations and study proposals Results

After analyzing the collected data, the study concluded the following:

- 1.** This report highlights issues of hate speech in the Libyan online media and social responses to this phenomenon.
- 2.** The research strategy for this report combined multiple techniques for data collection and analysis. The research began since its first launch in 2017 by collecting and defining the concepts, phrases and sentences of hate speech in the media and how to employ them over the Internet, which examines how to deal with hate speech.
- 3.** Hate speech is a complex relationship with freedom of expression, the individual, the group, minority and rights, as well as the concepts of dignity, freedom and equality. Its definition is often contested in national and international legislation.
- 4.** (24069) professional violations were detected during the study period from all media outlets, of which (5629) were false news, the most of which were accusations without evidence and fabrication of photos and videos, shaded and biased news. (18440) of these violations were hate speech, the most of which were incitement, insult, defamation, inaccuracy and subjectivity in the coverage of armed conflicts and the call for violence or killing. It was found that the most frequent violations took place during the months of April and March.
- 5.** The study revealed that the editorial departments in the media were the biggest source of professional violations, followed by representatives of the forces of General Khalifa Haftar, then representatives of the Government of National Accord, and then activists or political analysts.
- 6.** The study showed that the most professional violations were manifested in a variety of journalistic forms, most of which were news reports, photos and videos, and headlines.
- 7.** The study revealed that the most targeted bodies during the study period were representatives of General Khalifa Haftar's forces in the first place, then representatives of the Government of National Accord forces in the second place.

8. The study showed that most of the attacks are targeted at groups or institutions in the first place, and then at male persons in the second place.
9. The study showed that the Al-Jamahiriya channel was the most common media institution for which professional violations were monitored, then in the second place, Al-Tanasuh channel, followed by Al-Marsad newspaper, then the February channel, then the news website, then the Libya Al-Ahrar channel.
10. The study revealed that the media institution the most inciting hatred and armed conflict is the Al-Tanasah channel in the first place, followed by the Al-Jamahiriya Channel in the second place, then the February Channel, then Libya Al-Ahrar Channel, then the Alsa 24 news website.
11. The study showed that the news outlets with the most false news that were monitored, was the Al-Marsad newspaper in the first place, followed by the Jamahiriya channel in the second place, then the Alsa 24 news website, then Al-Raed network and then Al-Tanasuh channel.

• Recommendations

After analyzing the data and extracting the results, the study recommends the following

1. The initiative to hold seminars, discussion panels and lectures in order to immunize and strengthen the community's immunity from the hate virus and from media illiteracy to put an end to hate speeches and false news.
2. The need to confront the media institutions that are exporting hate speech, false news, rumors and related intolerances, including what happens on the Internet. Whereas, the Internet has become a tool for spreading hate speech, and it is a forum for the exchange of opinions, expression, dialogue, education, knowledge management and information exchange.
3. Holding training courses in the field of human rights, tolerance, combating discrimination and preventing stereotypes for the benefit of government officials and public officials, especially in the field of law enforcement, the police and security services.

4. Addressing intolerance, stigmatization, negative stereotyping and discrimination, through public awareness campaigns and educational measures.
5. The need to address hate crimes at the national level, criminalize calls and incitement to hatred, and ensure freedom of opinion and expression are protected to ensure equality and combat tribal intolerance.
6. Combating hate speech and cyberbullying through media and information education.
7. The importance of many parties raising awareness of the negative effects of spreading hate speech on social networks, that uses various arguments, including religious ones, preserving identity and other arguments that covers hate speech.
8. The necessity for civil society and state institutions to contribute to spreading a culture of tolerance, rejecting and fighting hatred.
9. Teaching the media outlets the need to respect human values and principles in everything they broadcast and publish through social media.
10. Raise awareness of legislation and laws that criminalize hate speech and fake news.

- **Future suggestions**

1. We suggest conducting more studies on various aspects of the issue of hate, and studying ways to confront this phenomenon.
2. Conducting other studies on other media outlets that have not been studied in the current study.
3. Adopting this study as a previous study and comparing its results with other studies targeting other media institutions.
4. Conducting studies based on various data collection tools, such as a questionnaire, for example, to survey the opinions of citizens and compare their opinions with the results obtained by means of content analysis.
